

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

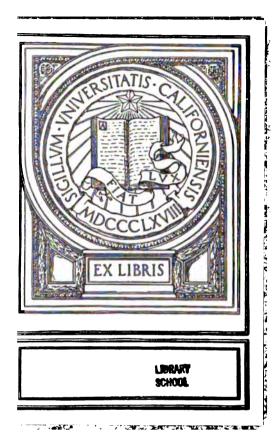

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + Refrain from automated querying Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. INTRODUCTION

In compliance with Act No. 323, Public Acts 1913, this list of books has been prepared by the Superintendent of Public Instruction and the State Librarian, for the use of district schools. The list of books for township libraries will be compiled as soon as possible.

The new catalog is an enlargement of "A First Selection of 500 Children's Books for a Library" compiled originally for the State Library, by Miss Effie L. Powers, children's librarian of the Public Library, St. Louis, Mo. The present compilation has been made by Miss Mabel C. True. The books have been selected after personal examination and reference to library lists made by librarians, whose judgment cannot be doubted.

when possible a choice of different editions has been given, but in all cases an effort has been made to avoid cheaply bound and poorly made books. The more expensive editions are not recommended for purchase by schools which have a limited amount of money. The text of the several editions is

identical, the difference being in the paper, binding and illustrations.

The discount price in the catalog is the price for which the books should be furnished to Libraries and, in all cases, be allowed by bookdealers; if the local dealer will not follow those prices the following bookdealers in Michigan have agreed to furnish them:

McCauley Bros	 . Detroit
J. V. Sheehan & Co	 . Detroit
George Wahr	
Crotty Bros	 . Lansing

These prices do not, however, include freight or express charges which are paid by the purchaser from the point from which the books are purchased.

It is proposed to issue semi-annually supplementary lists of new books, thus keeping the purchasers in touch with late publications. The books contained in the catalog will be permanently placed in the State library for inspection by school officers and others who may wish to personally ex-

amine the books before purchasing.

It has been unofficially stated that the amendment to the parcel post law, which will become operative March 15, 1914, provides for the inclusion of books, also an increase in the number of pounds which may be sent and a decrease in the rates. Under this amendment packages of books weighing not more than twenty pounds may be sent through the mail; full information on this subject may be obtained from the postmaster.

> FRED A. KEELER, Supt. of Public Instruction. MARY C. SPENCER, State Librarian

RELIGION

The complete Bible is the home book. The library should supply abridgments, adaptations and relative subject matter for temporary use. The selection for children's use should be made from actual reading of the books and the number should be limited. Old Testament stories and New Testament stories, bound separately, are usually better than general collections.

MYTHOLOGY

"Myths. In early ages man recognized forces external to himself which largely determined the conditions of his life. These forces of nature, such as light and darkness, fire and summer and winter, he personified and made the subject of stories. In the same way he theorized about the origin and control of the universe, attributing the governing power to one God or many gods, and inventing stories about the relations of these divinities to each other and to man.

All these stories are called myths. Examples are the stories of Persophone, the spring; Phaeton, the driver of the Greek sun-god's chariot; and the death of Baldur, the Norse sun-god."

FAIRY TALES AND FABLES

"Fairy tales are not ordinarily concerned with the great forces of life like mythology, but with its details. They represent the effort to imagine a freer, richer life independent of actual conditions. The fairies, genii, trolls, or continually thwart man's desires and work him ill. The fairy tale does not deal directly with ideas of right and wrong. It may have a moral purpose, as in Andersen's tales, but this purpose is subordinated to the story.

Fables do not deal with supernatural beings, and depart from the natural only in giving to animals and inanimate objects human characteristics and The fable differs from the fairy tale in having a direct moral purpose, usually showing the result of a single trait of conduct, such as vanity in the fable of the Frog and the ox."

FOLK-LORE AND LEGEND

"Legends are mixtures of popular tales and literary invention cast in narrative form and told as records of fact. They usually deal with some character of heroic type, such as The Cid, and Siegfried; some storied locality, as in the legend of Sleepy Hollow; or some event or period in the mist-shrouded early history of nations, as in William Tell and Horatius at the bridge. The terms myth and legend are often used inter-changeably; and as the term myth is used by scholars, they have something of the same significance, that is, folklorists believe that myths are based on some actual custom or observance of the primitive people who have made them, as legends are based on the deed of some actual hero. As the terms myth and legend are used in literature, however, there is a real distinction, namely, the myth is wholly the product of the imagination and has a symbolic meaning, while the legend usually has a basis of historic fact. The legends of both Greeks and Scandinavians are inextricably interwoven with their myths, as in the Odyssey and the stories of Beowulf and Siegfried.

Folklore fairy tales, fables, legends, etc., which are the product of the folk mind rather than the deliberate invention of a single author may be included under the general term of folk lore. The fact that many nations have the same folk stories probably shows that they are based on the same racial myth common to several people. From constant retelling they have either lost their underlying meaning and become purely faciful stories, or have become connected with some hero, either mythical, like Perseus, or national and semi-historic, like Frithjof, Siegfried and Horatius. Usually these cycles of hero-myth are concoctions of many different myths strung

together by some ingenious poet rather than by the people as a whole."

All orders should be sent to CHARLES F. PIKE, Manager, Wyandotte, Michigan.

Read the following instructions:

1. Money should accompany all orders.

2. Give name of express office to which you wish the books sent.

Money may be sent by draft, money order, or registered letter.
 You may order as many as you like. Whole or part of list may be

ordered.

The prices given for books in the Young People's Reading Circle list are lower than the prices quoted in the main list for the following reasons:

1. Special prices have been made by the publishers.

2. Often a cheaper reprint has been issued. The context is the same but

cheaper paper, prints and binding are used.

REFERENCE BOOKS

To judge a reference book correctly as to its general reliability requires a specialized knowledge of details. As reference books are also expensive, especial care is needed in their selection. To prevent mistakes in this direction, this list has been compiled. Much time and thought have been given to it, each book having been personally examined and compared carefully with others of its class, and with books in similar lists in other states. The aim has been to include such books as would supplement the school texts and the material in the main list, either by supplying further information or by giving it in a more concise and scientific form. Nothing beyond the comprehension of the grade pupil has been included, though most are usually classed as adult books, and a few were placed here as too mature in treatment for inclusion in any juvenile list. In contrast with the cultural aim of the main collection, these books are tools with which to further and enrich the work of the school.

MICHIGAN BIBLIOGRAPHY

This includes two classes of material; (1) books about Michigan which are not included in the general collection, either because they were textbooks or because of maturity of treatment which made them unsuitable for a strictly juvenile list; and (2) references to books already in the collection, which contain Michigan material. It is hoped that this list will be found valuable and useful. Additions to it will be found in the lists of new books which will follow the present publication semi-annually.

Brief references to topics found in all histories have not been included here. For such references see the indexes of the books themselves.
